

## 1. Introduction

The objective of the CEN Construction Sector Snapshot is to provide standardizers and users of the standards with an overview of:

- the draft standards developed by CEN and ECISS Technical Committees, which will be cited in the Official Journal and provide presumption of conformity to the Construction Products Directive (CPD – 89/106/EEC);
- the amendments and revisions of harmonized product standards (hEN) already cited in the OJEU.

Priority is given to the 'market' vision of the Standard. Therefore, corrigenda, amendments or revisions are not totalized separately but in a group, which progress is measured according to the global progress for the purpose.

The labels used in the different sections of the snapshot can be understood as follows:

Standard:	Generic part of a Standard reference without date or function (for more details see the 'linked work item' description).
Title:	English title of the (draft) standard
Linked Work Item:	Gives the unique CEN Work Item identification and, if existing, the the full Standard reference
Last realized:	Gives the last registered (date of the Snapshot) evolution in major steps (description and internal milestone numbering) for each Work Item
OJEU:	Gives references and dates from the registered history in the Official Journal from the European Commission.
DOW:	Date of withdrawal registered in the CEN database. There may be a difference with the dates cited in the OJEU (last minute change or registration time discrepancies).
Man:	Gives a list of all mandates linked to the concerned Work Item (also manadates which are not specifically linked to the CPD).

Moreover, several acronyms, referring to the different steps of the approval process of a standard, are used to describe the last registered evolution (more information on each step can be found on the CENBOSS <http://www.cen.eu/boss>) and mean the following:

- ENQ: Enquiry
- FV: Formal Vote
- UAP: Unique Acceptance Procedure
- DOR: Date of Ratification
- DAV: Date of Availability
